

iOS Deployment Essentials Workshop

Interactive training and hands-on practice with iPhone and iPad deployment scenarios.

Learn about Apple's revolutionary Device Enrollment Program, and acquire the skills, tools, and knowledge needed to seamlessly and easily deploy iOS devices in your organization. Participate in interactive discussions and hands-on exercises which will guide you through the configuration, management, and supervision of iOS devices. Work through real-world scenarios to reinforce what you learn. [Register now.](#)

Workshop Topics

Manage Settings

Introduction to the iOS MDM protocol and how an MDM solution is used to configure and manage devices over-the-air with consistency and accountability.

Apps and Content

Introduction to Apple's VPP. Assign apps and content to users and then configure and test managed "open in" functionality.

Personalized Company-Owned Devices

Configure settings to enable over-the-air enrollment and supervision while

learning how these devices can still be personalized by the user.

Shared Company-Owned Devices

Configure and test shared device scenarios. Apps and content are distributed to the devices but users are not able to personalize their device.

Scenario Workshop

Design a deployment plan to meet a given real-world scenario's needs.
