

iPad mPOS and Security Workshop

Learn about how a new iPad mPOS system with ApplePay support is the most user-friendly, attractive, and secure choice for your business.

Apple's iPad devices are personal computers for the modern business world. Intuitive design, ease-of-use, and built-in security features make iPad the ideal hardware for mobile point-of-sale systems. Join us at Apple's office in Times Square Causeway Bay to learn about Apple Pay, and how powerful new payment terminals from BBPOS with ApplePay support connected to iPad devices can propel your business forward. In addition, MasterCard will provide an overview of how secured payment options can enhance customer experience, and Thales Critical Information Systems and Cybersecurity will explain how you don't have to sacrifice safety and security for an easy to use mobile payment system. [Register now](#) for this free workshop, as space is limited.
