

iOS Real Estate Mobility Workshop

Learn about MewMe: a powerful new real estate solution running on iOS and macOS hardware which is set to transform and modernize the real estate industry in Hong Kong.

Buying or renting a property has never been easier, or more fun. With MewMe's revolutionary Mobile Estate Web system, called MewMe, real estate agents can now engage with property owners and customers via a powerful new social communication platform. And customers can experience available properties from the comfort of an agent's office with MewMe's integrated virtual reality technology. With iOS devices like iPad and iPhone, customers, agents and property owners can interact with each other and view available properties like never before, all while visualizing data from other transactions in the area. Join us at our office in Times Square Causeway Bay to learn about how MewMe's solution, running on iOS, can transform your organization, improve customer satisfaction, and increase your bottom line.
